Education

Air University, Islamabad — Wah Cantt

Sep. 2024 – Sep 2028 (Expected)

Bachelor of Science in Computer Science

Certifications: UI/UX Design (Udemy) · Python Programming (NUST University, Sep 2025)

Experience

Full-Stack Developer (Academic Projects)

2024 – Present

Air University, Islamabad

Islamabad, PK

- Built a complete Task Manager web application with full CRUD, user authentication, task categorization, and status tracking using ASP.NET and SQL Server.
- Developed EduConnect, a comprehensive education management platform in Blazor WebAssembly featuring course management, attendance tracking, and grade records.
- Collaborated in a group to build Vet.Web, a fully functional veterinary services website with responsive layouts, appointment booking UI, and service listings using HTML, CSS, and JavaScript.

UI/UX Designer (Semester Projects)

2025 – Present

Air University, Islamabad

Islamabad, PK

- Designed and developed Learn_Eaze, a mobile learning application UI/UX from scratch, building the fully functional Flutter/Dart app alongside the design prototype.
- Created Hydra, a security-themed application interface with dashboards, alert screens, and navigation flows for an Information Security semester project.
- Designed a modern Music Player interface with intuitive controls, playlist management, and visual aesthetics as part of a DSA semester project.

Data Analyst & Scripter (Self-Learning)

2025 – Present

Independent

Remote

- Analyzed a Netflix dataset in Power BI to extract viewing trends, genre distributions, and content patterns, creating interactive dashboards and visualizations.
- Wrote a Python automation script for scheduled file backups, practising core Python concepts including file I/O and automation.

Projects

EduConnect — Education Management System | Blazor WebAssembly, SQL Server

2026 – Present

- Developed a comprehensive multi-role platform for students and faculty with course management, attendance tracking, and grade records.
- Designed the full database schema and integrated server-side Blazor components for real-time data updates.

Task Manager | ASP.NET, SQL Server

2026 – Present

- Built a full-stack task management web application with CRUD functionality, user authentication, task categorisation, and status tracking.
- Implemented secure login and role-based access control using ASP.NET Identity.

Learn_Eaze — Mobile Learning App | Flutter, Dart

2026

- Designed and developed a mobile learning application UI/UX from scratch with full Flutter/Dart implementation alongside the Figma prototype.
- Implemented responsive layouts, course browsing, and quiz-style interactions targeting university students.

Restaurant Management System | SQL, ER Modelling

2023

- Collaborated with team members to design and implement a full restaurant management database with normalised schemas and SQL queries for order and inventory management.
- Created detailed ER diagrams and optimised query performance for multi-table joins.

Vet.Web — Veterinary Services Website | HTML, CSS, JavaScript

2024

- Group project: built a fully functional veterinary services website with responsive layouts, appointment booking UI, and service listings.

Technical Skills

Languages: C#, Python, Dart, HTML, CSS, JavaScript, Java

Frameworks: Blazor (WebAssembly), Flutter, ASP.NET

Developer Tools: Git, GitHub, Visual Studio, VS Code, Figma, Power BI

Databases: SQL Server, MySQL

Concepts: OOP, DSA, UI/UX Design, Database Design, Information Security, Content Writing
